

# GAZETTE SAYS IT CANNOT SWALLOW HUNTISM

## Forsakes Party On Head Of The Ticket

**CLAIMS THAT GOVERNOR  
DOES NOT REPRESENT  
TRUE DEMOCRACY; SIL-  
ENCE TO CHARACTER-  
IZE ATTITUDE.**

PHOENIX, Sept. 13.—The Arizona Gazette, the leading Democratic paper in the State today editorially refused to support Governor Hunt for reelection in the following statement of its position:

### After the Deluge.

As a result of the primary election of yesterday Governor Hunt has been selected by the small percentage of voters who saw fit to go to the polls as the party standard bearer in Arizona.

The Gazette regrets the result. It cannot do otherwise. This paper is convinced that Governor Hunt does not represent true Democracy. It is convinced that his administration is lacking in the finer qualities of statesmanship, and that it has not been exercised for the best interests of Arizona.

Be that as it may, Governor Hunt is nominated. After opposing Governor Hunt for the basic reasons which the Gazette has specifically and vigorously expressed, this paper cannot in good faith stand for what Huntism represents.

It will therefore be the policy of the Gazette during the impending campaign to present the news of the gubernatorial candidates in a news way accurately reported in these columns, but the Gazette will refrain from taking any editorial part in the battle for the governorship.

The Gazette is a Democratic newspaper. It believes in the principles of the Democratic party as enunciated by its really great leaders. It believes in Woodrow Wilson, and it believes in the ultimate working out of the problems which confront the party in State affairs.

The Republicans have nominated a clean-cut, straightforward party candidate and the issue is well joined. The Gazette will support the remaining candidates of the Democratic primary to the best of its ability. It believes them to be representative Democrats. There are plenty of reasons why they should be elected, and the sound arguments at the hands of the real Democrats are sufficient, if presented in a logical, dignified manner to insure a victory at the polls on November 7th.

The Gazette desires to make its position plain at the outset of the campaign that there may be no misunderstanding and no misconception. Because it is a loyal supporter of real Democracy it will remain silent on the governorship, and by the same token it will support every other candidate on the ticket.

### DETERMINES BIG ORE BODIES IN NEW SHAFT

(From Thursday's Daily.)

The strike made a few months ago in the New State mine of Hassayampa district, has been fully determined by connections made in work performed from the tunnel zone to the shaft by bringing both points into a relation from which operations are to begin at once on a large scale. The ore bodies exposed show permanency beyond any doubt whatever.

The original strike occurred in extending the old tunnel, at a point under the main shaft, but foul air prevented further exploration until an upraise was made. This was accomplished a few days ago, and according to a report made yesterday by J. R. Slack, a miner, the showing is remarkable for the extensive ore bodies determined. Mr. Slack states that the cross-cut from the tunnel has opened two veins of ore, each three feet wide, while in the shaft a 16-inch vein is exposed. The values are solely gold, and not an assay shows less than \$80 to the ton. The mine is now well ventilated by the connections made and future development will now go ahead under favorable conditions. The showing is so encouraging to the Maricopa Queen Oil Company, that the placing of a new operating plant on the Elk claim, which adjoins, has been decided upon that exploration of the entire fissure, including also the

Perry, will follow from the New State development.

The success of this movement is due to W. S. Wilhelm, general manager, and the predictions he made at the time of the New State strike have been verified. A new wagon road is also under construction from the central camp to connect with the main highway to this city to take in machinery and supplies and to prepare for large operations in the near future.

### RACE PROGRAM FOR THE FAIR IS ARRANGED

(From Thursday's Daily.)

Plenty of fun and amusement will be on hand in Prescott during the three days' festival of the Northern Arizona Fair. The race track program has been decided upon and this alone assures the many who will attend the fair an unusual and attractive line of events. "Doc" Pardee will probably have charge of the arena, with Floyd Williams as chairman of the program committee.

The concessions committee is considering bringing to Prescott some unusual attraction which will appeal to everyone and be of sufficient drawing power to attract the residents of the entire northern counties. A first-class carnival company will probably be signed for within the next few days and these events, together with plenty of good music and dancing, make it a certainty that there will not be an idle moment during the entire celebration.

Following is the program of events, which will be pulled at the fair grounds:

#### First Day.

1/4-mile horse race, free-for-all	\$300
Red and saddle race	20
3/4-mile cow horse race	60
Schlap race	10
1/2-mile cow horse race	50
Egg race	5
1 1/2-mile relay race, change each	150
1/4 mile	150
Barrel race	5
1/2-mile ladies' free-for-all	50

#### Second Day.

3/4-mile, free-for-all	\$300
Boys' three-legged race	5
1/2-mile cow horse race	50
Boys' chicken race	5
1/2-mile free-for-all	50
Catching greased pig	5
1 1/2-mile pony express, change each 1/4 mile	150
Boys' shoe race	5
1/2-mile ladies' cow horse race	50

#### Third Day.

2 1/2 furlongs, free-for-all	\$300
Flag picking	5
1/4-mile cow horse race	75
Reverse race	5
1/2-mile boys' burro relay, change every 1/4 mile, boys under 15	25
Girls' chicken race	10
1/4-mile consolation race, winners barred	50
Hat race	5
1 1/2-mile relay race, change each 1/4 mile	150
Wild horse race	100

### RICH TUNGSTEN DISCOVERY IS REPORTED

(From Thursday's Daily.)

Lester Ruffner and John Burris of this city are owners of an attractive new tungsten property, and the arrival from Eureka district yesterday of the latter with a 300-pound lot of unassorted ore that averaged 30 per cent in this metal, created very much interest in mining circles of this community. Burris gave details of the new find. He stated that the property is located in Connell canyon, four miles to the northeast of Connor's camp, where two locations were recently made. At seven points on the fissure open cuts were made for a distance of 700 feet, in each of which the mineral abounds. The vein opened is from four to six feet in width, lying in a contact of pegmatite granite and porphyry, with a red clay filling. Disseminated in this condition is the tungsten ore. To date he has produced over 500 pounds, and during his trip to Prescott shipping arrangements are to be made. The strike is one of the most important made in that field, and samples in the city confirm the magnitude of the new property.

### BANDITS REPELLED

BY AMERICAN GIRL

BERKELEY, Sept. 13.—Miss Octavia and Miss Mary Downie of the University of California have been entertaining their sorority sisters with accounts of life on the Mexican border, where they spent their vacation on a ranch near Sanderson, Texas, 25 miles from the boundary. "It was like living in a pioneer settlement surrounded by Indians," said Miss Downie. "At Sanderson, the nearest town, they had a vigilance committee known as the home guard. On the ringing of a bell, the home guard assembled and the rest of the town gathered in the school house." Miss Downie told a thrilling story of being left alone on the ranch and of seeing several Mexicans creep toward the house. When she faced them with a gun, they explained that they were "rabbit hunting" and slunk away.

# LAST CHANCE IS TO BE LARGE MINE CAMP

**MODERN EQUIPMENT IS  
ORDERED; NEW PROP-  
ERTY MAKES GOOD  
SHOWING.**

(From Thursday's Daily.)

Arrangements were closed yesterday by which the Last Chance gold mines near Walker, are to be placed in active operation in a short time by the introduction of one of the biggest plants of any property in that field, was the announcement made by C. Benjamin Hayes, the owner.

The equipment ordered from the Arizona Mine Supply Co., consists of a Chicago pneumatic compressor to drive two drills, a two-cylinder air hoist, of 500 feet capacity, and a new pumping plant and engine, making one of the most modern operating plants in the county. Lumber leaves today to begin construction of a five-room bungalow, a new compressor and engine house, blacksmith shop and other surface improvements. Mr. Hayes stated yesterday that mine development fully warranted a larger plan of operating than had been under way in recent months. The shaft from top to bottom carries a free milling ore that will average \$12 to the ton in a vein determined by cross-cutting. It has a width of fully ten feet. Picked samples of ore run to as high as \$200 to the ton. The purpose is to sink to a vertical depth of 500 feet, with drifting and cross-cutting from certain points, development for months to come being the motive, and with production a secondary object.

Mr. Hayes is behind this big movement on an individual basis, and has no associates. Under these conditions the Last Chance is an exception to the general rule of large mining movements in this field, being individually owned and under these conditions it will go ahead in the future. The Last Chance was located by its present owner about a year ago, and has since been quietly operated. It is situated on the mother lode of the district, about 1 1/2 miles to the north of Walker.

WOMAN ON WAY  
HERE TO FIGHT WILSON

WASHINGTON, Sept. 13.—Miss Helen Todd, secretary of the International Child Welfare League, is now in Tucson, Arizona, where she will take the stump for the Woman's party against President Wilson and the Democratic national ticket. She will speak also in other Western suffrage States.

Miss Todd declared that President Wilson originally had declined to back the child labor bill on the same ground on which he objects to having congress pass the Susan B. Anthony woman suffrage amendment, namely, that it was a State matter. Having forced the child labor bill through at last, despite his previous assertion that it should be left to the States, there is no reason, Miss Todd asserted, why the president should not have pushed the woman suffrage amendment through.

"The women of the West who have had an equal share with the men in building up the country, whose mothers or whose grandmothers went West on the old prairie schooners," said Miss Todd, "cannot understand why the Eastern woman should be denied the right to vote and a share in government. In Arizona and many of the other States where the vote came very easily to the women and where the men would not have thought of voting against equal suffrage, the women sympathize deeply with the difficulties which the Eastern women have to fight against in their struggle to gain their rights."

"In these days of preparedness, when women are giving of their money for their labor, yes, their own hands and sons, to the country, President Wilson shows that he does not realize the spirit of the times in denying to women—who are doing their share in the industrial and every other phase of government preparedness—all right to have any share in the direction of government. Surely at a time when women have shown their willingness to work in munition factories, help bear the heavy taxation and give freely of their sons for soldiers, it is no time to slam the door in their faces and tell them they can have no part in their own government."

PREFERS DEATH TO  
ENTERING HIGH SCHOOL

LOS ANGELES, Sept. 13.—Rather than enroll as a student in a High school, Olive Young, 15 years old, a

pretty girl of the brunette type, swallowed a quantity of ant paste.

While scores of happy boys and girls were passing the receiving hospital at First and Hill streets on their way to the opening session of school, Miss Young was being given anti-dotes by the police surgeons.

The girl was graduated from grammar school at the end of the term in June and was certified to High school. Several times recently she told her mother that she would rather not continue her studies.

After having eaten her breakfast, the girl informed her mother that she had decided not to go to school.

"Nonsense," said Mrs. Young. "This is the opening day of school. After you have attended school for a few days you will get over the idea of not wanting to go."

Without a word Miss Young left the room. A few minutes later her mother heard her groaning in a bedroom.

"I am sick," said the girl. "I am not going to school today. I would rather die than go."

The mother was insistent. She thought that the girl was feigning illness, and announced that such excuses would be unavailing.

"But I am sick," insisted the girl. "I am going to die. I never will go to school any more. I have taken poison!"

Frightened, Mrs. Young made an investigation and found that the girl had swallowed a quantity of ant paste. While the frantic mother was telephoning for the police ambulance, the girl became violently ill and almost lapsed into unconsciousness before she could be taken to the receiving hospital and pumped out.

### POPULAR SCHOOL TEACHER SOON TO BE BRIDE

Special Correspondence.

CLARKDALE, Sept. 13.—W. J. Jamieson has decided to abandon the pleasures of single blessedness. He will marry Mae Stuke, the daughter of Mr. and Mrs. C. C. Stuke.

The chosen bride, who for the last two years has been a teacher in the Clarkdale schools, is one of the most charming and popular members of the younger social set. Mr. Jamieson is a surveyor for the town of Clarkdale.

After the wedding, which will occur in a short time, the young couple will spend their honeymoon in a tour of the East, visiting in Canada and Virginia, the old home of the groom.

Mr. Jamieson was the honored guest at a banquet given by about 40 of his friends at the K. of P. hall last night. Two orchestras supplied the music, and R. C. Lane acted as toastmaster. A most enjoyable time was had, and at a late hour, Mr. Jamieson, with the hearty and heartfelt congratulations of all present, took his last sad farewell of the "boys."

### DISMISSAL OF TWO SUITS IS REQUESTED

(From Thursday's Daily.)

Requests for the dismissal of two suits filed in the Superior court recently were contained in answers to the complaints recorded yesterday.

John M. Sullivan, executor of the estate of Clara Lanzendorf, deceased, asked that the suit of Otto Spencer against the estate to collect several hundred dollars for alleged services as nurse and companion for the deceased be dismissed on the grounds that the complaint did not state facts sufficient to constitute a cause of action. All allegations in Spencer's complaint were denied.

A similar request was filed by Mrs. Annie E. Richards, administratrix of the estate of John W. Richards, in regard to the suit of John Markesbury. Markesbury filed suit several weeks ago against the estate claiming that it was indebted to him for a number of goats sold to Richards before the latter's death. A part of the purchase price only was paid to him by Richards, Markesbury alleged.

### DESERT VICTIM HAD PECULIAR SENSATIONS

(From Friday's Daily.)

Timothy Holmes, who was picked up on the desert last June perishing from thirst, was an arrival during the week from a Mohave mining camp, and again is in normal health.

He informed friends yesterday of peculiar sensations he experienced a few minutes prior to lapsing into unconsciousness, by hearing noises resembling a huge wheel revolving and emitting sounds like pieces of sandpaper being ground together. Until rescued and revived, Holmes had not the faintest idea of what was transpiring. In approaching to a normal condition he suffered intense pains in his head and for a few hours after being given water in small doses the drum of one ear seemed to be badly affected and caused him considerable pain. He was found near Bagdad by an auto party. He lost his way in reaching the Santa Fe road from a mining camp to the north. His canteen leaked, and he did not make the discovery until it contained less than a cupful.

# YAVAPAI MINES ARE PROVING OF MERIT

**ADVANCE IN PRICE OF  
LITTLE DAISY STOCK  
INDICATES WORTH OF  
JEROME PROPERTIES.**

(By William P. De Wolf)

To the layman the mining game is one filled with sensations. Since the memorable days of '49 when the lure of gold drew many a sturdy Easterner across the plains or around The Horn to California, a great many people have looked on the man who opened up a mine, no matter what kind, as an adventurer—a man who was fighting a losing game for the one, long chance. This was true in a great many cases in the early California days, but now there is too much competition among the mining men, and this struggle for the big ore bodies that are still untapped has resulted in the placing of mining among the big industries of the world—it is no longer a game of chance but an industry that, although comparatively in its infancy in Arizona, ranks far above all others and is increasing by leaps and bounds.

But the sensations still remain. Big strikes are being made daily and are holding the interest of the public. There is another kind of sensation in the mining game, however, that holds the center of the stage; that is the big producer that springs into the limelight almost over night, and then proceeds to remain there. Such a mine is the United Verde Extension. During the last few days stock in this property has advanced steadily until, at the present writing, it is selling around \$43 per share. The principal thing about the remarkable rise in the price of "Little Daisy" stock, however, is the fact that it has proven beyond the slightest doubt that the Jerome field is destined to become the greatest copper producing region in Arizona.

It is a rich field, every engineer who has looked it over admits this. It is a field of opportunity, also, for there are scores of properties that have been left almost untouched. But these properties are rapidly being taken over and developed. On some of them ore has not been encountered as soon as had been hoped for, but nevertheless every operator knows that the ore is there and that although it may be a greater depth than in other fields it runs high in value and is worth seeking.

### Most Producing Mines.

Although the Jerome district is attracting more attention than any other section of the county, the mines of Yavapai are not confined to that one district. The latest official government reports show that Yavapai has 107 producing mines, more than any other county in Arizona. Its nearest rivals are Cochise, with 67, and Yuma, with 59. Of these producers many are mines that were abandoned years ago when the slump in the price of metals discouraged many an operator in the Southwest. It is probable that more old mines have been reopened and proven of merit in Yavapai than in any other county.

One of these old properties, now being placed in readiness for the resuming of operations, is the Johnson gold mine, near Weaver. Since the death of its original owner many years ago, the Johnson has never been extensively operated, although from its proximity to Rich Hill mining men have contended that, from the strong indications of its quartz content, it was reasonable to believe that the mother lode of that belt passed through the property. The old workings are to be placed in condition at once, and the Johnson is expected to be in the hands of operators from the coast within a short time.

### Verde Apex Meeting.

A meeting of stockholders of the Verde Apex, the controlling interest of which was recently taken over by Prescott mining men, will be held in Phoenix, September 28th. At this time plans will be made to start operations on the property on the largest scale in its history. Lying in the Jerome field, and intermingling with the Veaur Hill property, the Verde Apex is looked upon as one of the most promising mines in the field and its new controllers plan to rush the work as soon as a definite plan of development is decided upon.

With the work of unwinding the shaft of the Arkansas & Arizona completed, engineers who have examined the property are formulating plans with the officers of the company to again place the A. & A. in the producing class. Operations will be started

as soon as the machinery for the property arrives.

### Green Monster Active.

The Green Monster plans to sink two 150-foot shafts on the Amazon and Missouri claims as soon as additional accommodations for a large force of men are completed. The points at which the shafts will be sunk have already been chosen from surface indications. The George tunnel on the Cliff claim has been cleared out and track laid to the elbow, about 800 feet in. Two cross-cuts are being cut on the Revenue tunnel, and indications are reported to be unusually favorable.

Arrangements have been completed whereby the ore from the Commercial copper mine, in Copper Basin, will again be treated at the Clarkdale smelter. During the lull in shipping for the last two months, a small force of men has been working at the Commercial, and several thousand tons of ore are now ready to be sent to the smelter. Recent development, it is said, has resulted in determining the best and biggest ore bodies in the history of the Commercial's operations.

South of the Commercial, work on the C. B. S. copper group is progressing favorably. The shaft has been sunk to a depth of 175 feet. The objective point is 200 feet, and when this is reached a plan of action will be decided upon by the owner of the group.

### Little Jessie to Resume.

The Little Jessie, one of the most famous gold mines in the county, situated in the Chaparral district, is ready to resume operations. Several months ago work of unwavering the old levels to the 350 was started. Ore conditions in the upper levels have been found satisfactory and further development was decided upon several days ago. The 650-foot shaft will be unwavering, and cleaned up, in order that observations may be made from that point. The Little Jessie is being revived by a syndicate of Ohio men who are determined that the mine shall be given every chance to assume its former place among the gold properties of Yavapai.

### New Property On Curb.

The latest Verde property to be listed on the New York Curb is the Calumet & Jerome. This property consists of six claims in the rich Verde copper district. On account of its location, between the United Verde and United Verde Extension, the Calumet & Jerome is looked upon favorably in this section, as well as among Eastern investors. The ore formation on the surface of the property is held to be the same geological conditions as exist at the 800-foot level of the United Verde Extension property.

The north and south faults of the Verde district cut directly across the entire length of one of the claims. The company has been financed and plans to sink a three-compartment shaft to a depth of 1,000 feet within a short time.

Extensive development is being planned for the old Silver Belt mines, near Humboldt, which were revived recently. Electrical machinery will be introduced on the property. Plans call for a new shaft of 1,000 feet in depth to be sunk at a point on the group near the Arizona, now being operated by Anderson & Birch. The Silver Belt was operated as long ago as in the '60s, and has attained marked attention for its large bodies of high grade silver-lead ore.

### DAMAGE CASE SETTLED

(From Friday's Daily.)

When the trial of the suit of Geo. Ball vs. Geo. M. White was resumed in the Superior court yesterday morning attorneys for both sides announced that the case had been settled out of court. Ball was suing for \$25,000 damages for injuries received when the old court house collapsed. The attorneys announced that a settlement had been reached for \$546 with the agreement that the defendant was also to pay \$36 jurors' fees.

### YOUTH MUST SERVE 3 MONTHS IN JAIL

(From Friday's Daily.)

After withdrawing his plea of not guilty and pleading guilty to the charge of having stolen an automobile owned by Frank Foster several weeks ago, Clifford Simpler, aged 18 years, was yesterday in the Superior court sentenced to serve three months at hard labor in the county jail. His sentence will be counted as having started September 3rd, the day on which he was arrested at Wickenburg by Sheriff Jeff Adams of Maricopa county, while driving the stolen car.

### PIONEER DIES

(From Thursday's Daily.)

Phillip Shearer, a member of the Pioneers' Home, passed away Tuesday night after a long illness, due to complications arising from an amputation of his leg some months ago. He had been a resident of Arizona for over 40 years, and was aged over 70 years.

# CAMPBELL PARTY IN BISBEE ON PRIMARY DAY

**TRIP IS MADE TO NACO  
AND CAMP OF THE AR-  
IZONA REGIMENT VISIT-  
ED SEVERAL HOURS.**

BISBEE, Sept. 12.—Tom Campbell, Republican candidate for governor, and party, arrived here this morning from Douglas. The party spent a few hours informally meeting the voters. They were in evidence on the streets early and the voting precincts were crowded all day. The election passed off very quietly, and the vote was heavy.

Campbell and party were given a reception at Lowell when they stopped there for an hour en route to Naco. Mr. Campbell met many old-time friends, and the Republican candidates were taken through the crowded streets and met hundreds of voters.

At Naco after visiting E. A. Folsom and other Republican leaders, the Campbell party went to the camp of the Arizona regiment and spent several hours. The officers and men were greatly disappointed because but few of them were allowed to vote. Only those who had certificates of registration and transfers were accepted by the election officers, and they were few in number. There are over 800 voters in the Arizona regiment, and the vote cast by the soldiers was small. They had been advised that they could vote by showing their registration and swearing in their vote, but the officers of the election refused, so there was genuine disappointment and not a little anger in the camp today. That there will be no slip when the election in November rolls around is to be made certain.

The officers and men are in excellent health and spirits and Tom Campbell, Mr. Merrill and Mr. Smalley were given a cordial reception. Owing to an engagement in Bisbee the party was unable to remain to witness the regimental parade in the evening, and they were compelled also to refuse an invitation to dine with Captain Sidney Mashbir.

Captain Soto, a Tucson officer, was busy preparing his company's quarters, the move from Fort Huachuca having been completed only last Saturday.

The political affiliations of the regiment go into every party and faction, but one thing is certain, Tom Campbell made an impression among the soldiers which will make it hard for them to pass his name on the November ballot without placing a cross opposite it.

Bisbee has a live Republican club of which Bertram Smith is president. A recent meeting taxed the capacity of the hall and many were turned away. Secretary Johnson of the Bisbee Club, escorted the Campbell party over the city and to Naco.

The same condition was found here in Bisbee relative to the registration of Republicans in the Democratic primary. The Hunt-Olney controversy and local contests were responsible for this, the Republicans having no contests to make it worth while to them to register in the Republican primaries.

The number of Republicans who did not register at all is very large in Cochise county, and the Republicans are to make a campaign at once to secure their registration.

Campbell and party leave in the morning for Tombstone, where a couple of hours will be spent, and from there to Fairbank, Benson and Tucson, arriving at the latter place at 5 o'clock Wednesday evening.

This completes the journey covering 3,500 miles which Mr. Campbell, Mr. Smalley and Mr. Merrill began at Phoenix August 22. Mr. Campbell will go to Phoenix from Tucson to consult with Chairman Tom Maddox and Doane Merrill will return to his home in Benson.

### JESSIE STARTS UP

(From Thursday's Daily.)

W. H. Jones, recently appointed superintendent of the Ohio Mines Co., left for the Little Jessie camp in Chaparral yesterday to begin operations. He was formerly in charge of the property and during his administration new development given and shipments made reflected his capability as a thorough miner. He begins unwavering from the 300 to the 650-foot level as the initial move for resuming.

If you want an engraved calling card, give the Journal-Miner your order.
